

FEBRUARY 2014 OMNIBUS WEEK 2
PEW RESEARCH CENTER'S INTERNET & AMERICAN LIFE PROJECT

PIAL1A. Now I have a few questions about the future. Some books and movies portray a future where technology provides products and services that make life better for people. Others portray a future where technology causes environmental and social problems that make life worse for people. How about you? Over the long term, do you think that technological changes will lead to a future where people's lives are mostly better or to a future where people's lives are mostly worse?
